

# PICTURING PLACE

## A Series of Free Photography Workshops for Kids

*Picturing Place* is a summer workshop series for kids that explores place through experimentation with historic cameras and photographic print processes. Participants will learn what it means to photographically capture the spirit or identity of a particular place and how changes in technology influence the ways in which we experience and see the world around us.

For more information about the *Picturing Place* workshop series please visit [www.retromediaproject.com](http://www.retromediaproject.com).

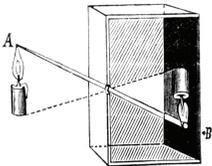

### **Picturing Place Downtown**

*Thursdays, June 29th – August 3rd from 2:30-4:30 p.m.*  
*Hillsdale Community Library*

A series of 6 free photography workshops for youth in grades 5th- 8th. With historic downtown Hillsdale as the subject, participants will learn ways that photographers document the spirit and identity of a place and they will explore vintage and handmade photographic technologies such as large format photography, panorama photography and stereoscopic photography. Please bring a small camera. All other materials and equipment are provided.

### **The Amazing Camera Obscura!**

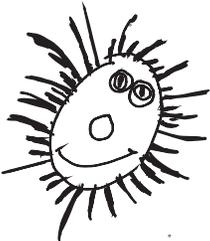

*Wednesday, July 12th from 3:00-4:30 p.m.*  
*Hillsdale Community Library*

A single session workshop for K-5th grade youth that explores features of the very first cameras, how they worked and ways that we use the same technology today. During the workshop participants will also learn how to make their own origami camera obscura that they can take home. All materials and equipment are provided.

### **Sun Prints**

*Wednesday, July 26th from 3:00-4:30 p.m.*  
*Hillsdale Community Library*

A single session workshop for K-5th grade youth that explores the historic cyanotype or sun print process. Known for its signature prussian blue color, cyanotypes have been used by botanists to document plant structure and by architects to duplicate architectural drawings. Workshop participants will be given several prepared sheets of cyanotype paper to make their own sun prints to take home. All materials and equipment are provided.

### **About the Workshop Series**

*Picturing Place* workshops are taught by Pam Heckel. She is a local portrait photographer, arts educator, and founder of a unique mobile media studio called the Analogue Dragon.

The workshops were created by the Retro Media Project and delivered to the community in partnership with ArtWorks of Hillsdale. It is part of Hillsdale Community Library's 2017 Summer Reading Program events.
